

TTWeb

The New Wave of Host Connectivity Management

TTWeb provides unprecedented control over the deployment of your host connectivity software combined with centralized configuration, license management and security.

Software distribution, management and configuration is a logistical nightmare for most organizations. Whether it is the initial installation, change to a new product or simply updating an existing one, there is a great cost in time and resources attached to this activity. With TTWeb these functions are automated and centralized, making rollout blowout a thing of the past.

Reduced Deployment costs

TTWeb has all of the power of Turbosoft's popular terminal emulation solution TTWin, but with the added benefit of automating the deployment and management of software. In short, TTWeb will allow you to take advantage of major reductions in the cost of keeping software current whilst ensuring that the users get the greatest benefit in the shortest time. Furthermore, with TTWeb, the deployment can be completely invisible to the user.

Customized configuration

As well as automating the deployment of the software, TTWeb can be centrally configured and customized for each individual or group of users that make up the organization. The central control of software configuration greatly reduces the ongoing support costs. All in all, Turbosoft's TTWeb offers IT managers an unprecedented opportunity to take control of the management and distribution of software.

Flexible deployment options

TTWeb can be used as an application embedded within a web page, or as a stand alone application. The embedded control offers you the ability to seamlessly integrate host access into your web page. Again, TTWeb can be totally customized for your users.

License management

The benefits of TTWeb go further still by taking the guesswork out of license management. TTWeb's license server enables the administrator to monitor license usage from anywhere on the network, and optimize the usage of TTWeb.

★ Features at a glance

Centralized configuration

All client configurations are managed in one location.

Embedded or Stand alone

TTWeb can be launched embedded in a web page, allowing you to fully tailor the way you present the host environment to your users. Alternately, a stand alone mode offers the users a TTWin application window independent from the web browser.

Javascript Controlable

TTWeb sessions can be controlled by Javascript. Add web page buttons to automate common tasks or access TTWeb's more advanced features.

Automatic updates

Users automatically receive any updates applied to the server each time they start TTWeb. You can change the users configuration or apply new software updates, knowing that all your users will be updated.

Gain access to all hosts

TTWeb supports more than 80 different terminals in the one product. Each emulation is extremely accurate and configurable.

Data security. SSL3 + SSH1 & SSH2

Turbosoft regards data security to be an essential part of a terminal session and as such, we support industry standard encryption as standard.

Full keyboard re-mapping

Extremely flexible keyboard re-mapping. Users can map text strings, host sequences or emulation keys to any key combination on a PC keyboard.

And much more...

TTWeb shares many features of our flagship terminal emulator TTWin including advanced printing support, extensive character set support including DBCS, automatic font scaling, scroll history and more.

 Supported Terminals

ADDS	ADDS2020 Viewpoint Mode, ADDS Viewpoint
ANSI	ANSI - X3.64, ANSIEA - ANSI Extended Attributes
AWA	ADM 11/R/W/P/H & LSI
Bull	Bull VIP 7800
Data General	DG 210/211/216/216E, DG410/411/412, DG460-462/470 Character mode
DEC	DEC VT 52/100/101/102, DEC VT220, DEC VT320, DEC VT340, DEC VT420
Fujitsu	Fujitsu 6681
Hewlett Packard	Hewlett Packard HP 2392A, Hewlett Packard HP 700/92
IBM	IBM 3101, IBM 3151, IBM 3164 - Color, IBM 3270 TCP & SNA, IBM 5250
ICL	ICL 7561, ICL VT220+
Liberty	Liberty Freedom 1
Mcdonnell Douglas	P8/P9, P12, Micro Fusion
Prime	Prime PT25, Prime PT250
Quantum	Quantum QNX
Siemens Nixdorf	Siemens Nixdorf 97801
Stratus	Stratus V102, Stratus V103, Stratus V105
Tandem	Tandem T653
Televideo	Televideo TVI950, Televideo TVI955
Unisys	Unisys T27
UNIX ANSI	SCO ANSI Color Console, Interactive UNIX Color Console, Bell Tech. UNIX Color Console, AT&T UNIX Color Console, Linux
Wang	Wang 2110
Wyse	Wyse 50, Wyse 60, Wyse 350

About Turbosoft

Turbosoft Pty Ltd is a privately owned, 100% Australian company with over 20 years experience as a leading manufacturer of enterprise wide connectivity and network performance solutions.

Today Turbosoft markets its products in more than 30 different countries with numerous offices, resellers and distributors spanning across all parts of the globe. Our customers include an enviable list of local & international clients from a diverse range of market sectors.

 Supported Web Server

Apache
Microsoft IIS

 Supported Server OS

Any (Windows required for install & configuration)

 Supported Client OS

Windows XP
Windows Vista
Windows Server 2003
Windows Server 2008

TTWeb will run on the following operating systems but is not supported: Windows 95/98/NT/2000.

 Communications Protocols

SSH 1&2
Telnet (TCP/IP)
Telnet via SSL3 Tunnel
Telnet via SSH Tunnel
Serial

 Compatible Browsers

Internet Explorer 6 and above, with OCX controls enabled.
