

TTWin Lite

High Quality Windows Host Connectivity

TurboSoft's TTWin Lite is a breakthrough in low cost, streamlined terminal emulation for those organizations that need accurate and reliable terminal emulation without the frills. TTWin Lite is no lightweight when it comes to accuracy, robustness and reliability. It is built with the same technology as its big brother, TTWin, therefore guaranteeing you the same level of accuracy and completeness.

To maximise the benefit that our software brings to an organization, we back TTWin Lite with outstanding technical support. Support for TTWin Lite is provided via email and the Web.

Supported Terminals

About TurboSoft

TurboSoft Pty Ltd is a privately owned, 100% Australian company with over 20 years experience as a leading manufacturer of enterprise wide connectivity and network performance solutions.

Today TurboSoft markets its products in more than 30 different countries with numerous offices, resellers and distributors spanning across all parts of the globe. Our customers include an enviable list of local & international clients from a diverse range of market sectors.

Features at a glance

Single Product Terminal Coverage

TTWin Lite includes Terminal Emulations for the more common terminals within one package. No need to switch products to get different emulations.

Reduce Keystrokes with Keyboard Macros

Single keystrokes can do complex tasks. TTWin Lite allows you to map macros to keys (including alpha keys in various shift states). These macros will do the work for you. Reduced keystrokes means less time to do the job, and a more accurate result.

Productivity Enhancing

TTWin Lite increases productivity in many ways. Its Scroll History allows you to review information that has rolled off the screen, and use cut and paste to move this into and out of other applications such as spreadsheets and word processors.

Reduce your Support Costs

TTWin Lite's Accuracy and Reliability guarantee that your support costs will be minimised. TTWin Lite will work for you every time.

Configurable to your Requirements

TTWin Lite's configurability allows you to set it up so that it works best for you and with your applications. Match color maps to the attributes in your applications to not only improve the look of your systems, but reduce the error rate and operator fatigue.

Multiple Sessions

Run as many sessions as you need to, to one host system or to many.
