

## TTerm. Enterprise Grade Terminal Emulation for iPad.

TTerm is Turbosoft's terminal emulation App for iPad, offering comprehensive terminal and language support, support for Apple wireless keyboards, custom Hotspots for touch interaction, multi-session capability and a variety of other features designed to enhance terminal emulation on your device.

TTerm builds on the proven quality, accuracy and range of emulations that our Windows® product TTWin is renowned for.

With an attractive, clean interface it's designed to get you connected to your host quickly and easily with a minimum of fuss. For technical users with the need to customize and tweak configurations to meet the needs of a particular host or piece of host software TTerm makes it easy to drill down to advanced terminal settings.

### Features at a Glance

#### ✓ Accurate, Proven Emulations

Turbosoft has been developing terminal emulation software since 1988. Benefit from our experience with rock-solid, accurate emulations.

#### ✓ Secure Host Communications

Data security with SSH, Telnet via SSH tunnel, Telnet via SSL2/SSL3/TLS and SSH key support. For TTerm 3270 users Express Logon Feature (ELF) is supported.

#### ✓ Multiple Session Capable

Connect to multiple hosts simultaneously. Switch between sessions quickly and easily.

#### ✓ App Lockdown

Protects important configuration settings from unwanted scrutiny or lock down TTerm completely, restricting users to connection options you configure and provide.

#### ✓ Tools For Mass Deployment

Looking to deploy in a school, business or institution? Configure once and use built in import/export tools to make your job easy.

#### ✓ Hotspots

Make your host session finger friendly with ease. Add touch friendly Hotspots to your terminal screen in fixed positions or dynamically in response to screen content. Easily attach complex actions to each Hotspot.

#### ✓ Comprehensive Keyboard Support

Custom on screen keyboards supporting multiple languages and layouts, designed for touch screen usage.

#### ✓ Hardware Keyboard Support

For heavy duty users, TTerm supports Apple wireless (bluetooth) keyboards.
